- Html
- Css
- Bootstrap
- Javascript
- Core java
- Mysql
- Ruby on rails
- Git

Projects

Parking Slot Booking System (Aug 2023)

- Developed a comprehensive Parking Slot Booking System using Ruby on Rails, catering to the needs of a parking facility with 4 entry points and 250 available parking slots. The system efficiently manages the reservation process based on real-time vehicle data.
- The Parking Slot Booking System optimizes parking space utilization, reduces user wait times, and enhances overall facility management through efficient slot allocation and real-time monitoring.
